

BANGOR WHIG.

FRIDAY, MAY 21, 1841.

The sage editor of the Locofofo organ in this city, since his return to a post vacated by him a short time since, in every number of his paper discloses his utter disregard of truth and fairness by attempting to make up monstrous and distorted justic in the shape of aiding the fallen fortunes of his party, now writhing under the strong rebuke of the people, in the State and Nation. The last number of his paper contains an article, relative to the valuation of property in this city, and the effect of it upon our citizens, which is an remarkable for the wisdom displayed, that we deem it worthy a few moments consideration.

The leading idea of the article is, that as the valuation of Portland is \$3,406,514, while that of Bangor is \$1,919,413, and the property of Bangor is in fact only about one-sixth part as valuable as that of Portland, the State tax is out of proportion, and Bangor is burdened beyond its share. And this, after a little circumlocution, is directly charged upon those who conduct the affairs of this city.

It is said property was estimated too high in this city, and hence the increase of our burdens.

Now the plain, simple, undisguised idea from all this is, that the assessors of this city should have estimated the property at a very low nominal value, and thus have avoided its portion of the State tax. But, would this have accomplished the purpose? It is a notorious fact that this game in some towns in the State was so skilfully played according to the code of the Bangor locofofo editor, that even the return of all the tillage-land in the town, when compared with the number of bushels of wheat for which a bounty was claimed, shew a production of between one and two hundred bushels to the acre! The valuations were as great in the returns of taxes that they were entirely useless as a measure of value. The valuation of Bangor was reduced, while that of several other towns was greatly increased by the legislature. The returns from Portland show a large amount of the trade there to be asles by factors, which if true was right; but if dishonest, it would afford no justification for dishonest practices here. And if property was by any means under valued in Portland or elsewhere, it would be no just ground for pursuing that course in this city; unless the "common judgment" of those who control affairs in this city should outstrip the bounds of common honesty.

The Constitution of our State requires that "all taxes upon real estate, assessed by authority of this State, will be apportioned and assessed equally, according to the just value thereof." This is the law and the right, and by this the assessors of Bangor feel bound, however others may feel upon the subject. So far from "old speculative prices" being kept up here, the assessors' valuation of real estate has fallen off on an average of fifty per cent. since 1838, as appears by their records, excluding the present year.

This bungling and hibgwick attempt of the conductor of the locofofo organ in this city is a mere ruse to divert attention from the enormous State tax addled upon the people by the course pursued in the administration of this State under the reign of locofofism. The financial folly of that party has burdened the State with an enormous debt, for which we have nothing to show, and from which we cannot reap the slightest income. The people are borne down with taxes, and they naturally inquire the reason, and hence this attempt to shift off the responsibility from those who have run the State in debt for about two millions of dollars, on to the assessors of the city of Bangor.

The increase of the tax this year, in this city, arises entirely from the State tax, as the amount raised by the city is about the same as that of last year, including three thousand dollars for an enlargement of the Alm. House.

It is no pleasant task to expose the misrepresentations of any man, but as the conductors of a political press, we cannot concur that such bare-faced statements, and mean insinuations and falsehoods should go unexposed. We seek for truth. We ask only an honorable contest. And we appeal to all honest minded men to decide whether in case of the existence of real wrong, we should find this man mousing about in the fog of misrepresentations and showing false lights?

The western papers state that at St. Augustine when the news of President Harrison's death arrived there was a great justification among a large portion of the locofofo. In their reading of the constitution they put a construction upon it that in the event of the President *de facto* dying, the one (in this case Mr. Van Buren) having the next greatest number of votes would become the President. The locofofo had a glorious time, exonerated nearly all right, wrote in the morning, rubbed their eyes, dressed and took a cup of coffee, and then ascertained that

"It's all but a dream at the best."

For the members of the new Canadian Parliament living in the interior, are adopting measures for the erection of tents to accommodate themselves and friends at Kingston during the session. The price of board is said to be so enormous that this measure is thought to be indispensable.

Land, never ask to be repaid; shake hands, give treat, bear and forbear; do every body a good turn, hold your peace, suffer yourself to be cheated, and let every body tread on your corns, and, if you will be universally happy.

The PIRATE. We gave some facts in our last in relation to the supposed case of piracy. Further developments give a new turn to the case.

Three of the crew of the "Mug" presented themselves at the office of Mr. Bergen in New York on Monday and their relation gave a new color to the affair. They are Lyman French, of Maine, who is 21 years old; James Cantine, 20; James Fox. Captain Snow is not murdered, and the owners of the vessel have taken out warrants for him and the mate, and offered a thousand dollars reward for the Captain's apprehension.

The schooner leaked somewhat on the outward passage, and more on the homeward, but was perfectly controllable by the pumps during the whole time, till the night that she was abandoned, which was that of Monday, May 12th. The Captain and whole crew left in the boat, for the reason that the water increased in the hold in spite of pumping. They landed at Little Egg Harbor about twelve o'clock on Tuesday.

French says that after landing the captain took from his chest a stocking, which appeared to contain specie; took from the stocking ten of the five thousand dollars, and then returned the stocking to the chest, and locked it. The next morning, the captain and mate left Little Egg Harbor for Philadelphia, taking with them the captain's chest, and leaving in charge of the men the nautical instruments, which, together with the boat, were brought on by the men. French also avers that while the boat was getting ready, the steward made several attempts to go into the cabin, but was prevented by the captain. Thomas Smith, alias Cunningham, was left at Little Egg Harbor, sick.

Cantine, the steward, states that during the passage in the boat they saw several vessels but the captain refused permission to the hands to attempt to board them, and ordered them to make way for the land.

He further states that his suspicions were excited that all was not right some time before the leak was discovered, and mentions several circumstances as the cause, such as the vessel running with the wind under sail, while others in sight had all their canvas spread; his being ordered to make two strong bags, one for the captain, and one for the mate; an offer by the captain to sell him the schooner's boat for \$10, &c. &c.

Mr. Mitchell, the forger arrived in New York on Monday under the custody of Police officer Bowyer. Mitchell, instead of going West from Philadelphia, disguised his person and attire, and turned to New York, came up the River and passed on to Montreal, where, in consequence of the disturbed relations between this Government and England, he supposed he should find protection.

In Philadelphia he procured a ticket at the Pittsburgh Railroad Office, (for the purpose of misleading any who might be in pursuit) he disguised himself in a suit of grey clothes, a broad-brim hat with crepe band, in which dress and green spectacles, and with a carpenter's rule in his hand, for four days openly walked the streets of that city, frequently meeting persons with whom he was well acquainted. He left Philadelphia for New York in the care, and went up the river in the steamboat Utica, bearing all the while in company with persons whom he knew, but none of whom detected him through his disguise.

An incident occurred at Troy, which shows the constant apprehension of discovery under which he must have been laboring; while purchasing a stage ticket at that place, a person standing behind him, read aloud from a newspaper a paragraph, headed "Mitchell the Forger," upon which the guilty man turned suddenly around, under the conviction that he was discovered; but finding that such was not the case, he merely said he knew him, and believed him to be a great rascal.

The New York Courier says that Mitchell is in good health, and appears reckless as to his fate; avowing his determination to plead guilty of the crimes with which he is charged.

Mr. McLeod's case came up before the Supreme Court in New York on Monday last. His counsel read to the Court an affidavit made by McLeod, setting forth the fact and purpose of the occupation of Navy Island; that the Canadian was employed in conveying stores, ammunition, &c. thereto; that by order of Col. Mc Nab, the authorized commander of the British force, an expedition for the destruction or capture of that boat was got up and carried into effect; that in the capture and destruction of the boat, Amos Durfee, for whose murder the prisoner in question was killed, and not at any other time or in any other manner; that the act of taking and destroying the boat was subsequently approved and adopted by the British Government; that the United States had opened a diplomatic correspondence with the British Government in relation to that act, in which representation and redress thereto were demanded, and which correspondence is not yet closed; and finally, that he, the prisoner, was not present or engaged in the said attack upon the Canadian, or in the capture and destruction thereof.

Several public documents, principally letters between officers of the U. S. Government and the British Minister were then read. After the reading of these documents, the District Attorney read the demurser interposed in behalf of the people, stating the reasons for opposing the motion for a discharge. The Attorney General then avowing that he was not prepared to go into the whole argument, as was insisted should be done, and wishing to consult his associates, the District Attorney of Niagara, the case was adjourned to the next day.

An exchange paper says that the most important question for a young lady to ask, when a man poses the question, is, "Do you take me paper and pay for it?"

But, go on, says the ex- "four-happy" or misery. The ex-bridge of love is pleased, the marriage of interest easy, and the marriage in all the display of a false and vicious fashion, will find their disreputable & vulgar

friends both, but happy.

Land, never ask to be repaid; shake hands, give treat, bear and forbear; do every body a good turn, hold your peace, suffer yourself to be cheated, and let every body tread on your corns, and, if you will be universally happy.

NEW AND IMPORTANT DISCOVERY.

DR. PHILLIPS' COMPOUND

TOMATO PILLS,

ENTIRELY VEGETABLE.

A New and Invaluable Medicine for all Diseases
arising from Impairment of the Blood, Ab-
scesses, &c.

Secretions of the Liver and Spleen, &c.

Substitute for Calomel;

as a Cathartic in Fevers and all
Billious Affections.

THESE popular Pills being a combination of a
newly discovered Alkaline substance, extract-
ed from the TOMATO PLANT, with other vegeta-
ble substances which have been found to qualify
and give its effects, are believed to be the best
Alterative and Cathartic Medicine ever discovered.

They have been abundantly and successfully tried,
and have received universal approbation for Scro-
fula, Hydrocephalus, Various Diseases, Grav-
el, Rheumatism, Coughs, Colic, Influenza, Catarrh,
Nervous Diseases, Acid Stomach, Gout, &c.,
Swelling of Gall-bladder, Costiveness, Colic, Head-
ache, &c.

They are an antidote to Contagious and Epidemic
diseases; prevent the formation of Billious and
Liver affections; Fever and Ague, &c., in those
who reside in hot climates, and low and marshy
countries, and are the best Cathartics that can be
used for those maladies. Framed will find them an
invaluable remedy for the Surveyors and Travellers,
the best cathartics they can use, to counteract the
danger of exposure in inhospitable climates. For ordi-
nary Family Physic, they are universally approved
as the best ever offered.

THESE Pills, a powerful and salutary operation
upon the Glandular System, removing all
affections from the Gland, wherever situated, Se-
ssiles and Serpuliferous Tumors in all their forms, and
if persevered in, no case of Scrofula, however se-
vere, need its influence. It is in their operation
on the Glandular System, that their effects are
peculiar and potent, and so nearly resemble that
of Calomel. In fact, the Tomato has all the AT-
TERATIVE, Deobstruent and Cathartic properties of Calomel,
without producing unpleasant or injurious effects under any circumstances, either from
exposure to cold or wet; on the contrary, the Com-
pound Tomato Pills are the best remedy ever known
to counteract the effects of Mercury, completely
graduating every particle of it from the system, and
renovating the constitution broken down by its use,
while it does by correcting the state of the blood,
and through that, correcting the morbid secretions
of the glands, and restoring them to a healthy and
their own proper action. Its effects are analogous
to Sarsaparilla and Blood Root, and in its combin-
ed action in the ingredients composing the Pills, it
exerts a universal action peculiar to itself.

The peculiar virtues of the Tomato Plant, have
for a long time attracted the attention of the Medi-
cal profession and the Public, and a lively interest
has recently been directed to the future development
of its active powers, and its Albulous and
Aterative qualities, which the Proprietor is now

happy in being able to gratify, and presents his
Pills to the Public, with the full confidence of their
being the most safe and valuable remedy ever dis-
covered, adapted to all cases where nature is dis-
turbed, and when any of the functions do not per-
form their natural or healthy action.

Numerous certificates of cures, from those who
have taken them, and the testimony of several Phys-
icians who have prescribed them, all concur to cor-
roborate this opinion. The rapidly increasing de-
mand for, and the universal approbation bestowed
upon them, is an additional evidence of their
merit and usefulness.

In presenting this article to the public, the Propri-
etor was induced by the hope that a medicine
prepared with much care, and strict regard to the
Chemical and Therapeutic properties of its several
ingredients, should take the place of the thousand
and one irresponsible nostrums of the present day,
with which the country is deluged, and from the fa-
vor already bestowed upon it by physicians, and
others, he feels justified in expecting this result.

Open have the cures performed by this medicine
been the subject of editorial comment, in various
newspapers and journals, and it may with truth be
asserted that no medicine of the kind has ever re-
ceived testimonials of greater commendation than
we are attached to this.

Females from forty to fifty years of age will find
them a powerful assistant to nature, in the impor-
tant change in the functions of the system, removing
affiliations to Cancers, glandular swellings, &c., and
assisting to establish that new action in the an-
imal economy which nature often fails to do. None
should avoid a fire and continued use of them, if
they wish to escape a long train of incurable mal-
adies. For this purpose one should be taken every
night and morning, and continued as long as any
unpleasant symptoms remain.

For that congested and deranged state of the sys-
tem which occurs in the commencement of Spring
and Summer, these Pills are particularly applica-
ble, in preventing Rheumatism, Coughs, congestion
of the lungs, &c., and have prolonged many a life
that otherwise would have been a sacrifice to the
changes of the season.

Those persons liable to sore throats, swelling of
the glands, coughs, and other symptoms indicating
Scrofula or Consumption, should take warning
in season, and embrace a remedy, which, while it is
searching out and eradicating disease, makes no de-
flections from the vital powers of the system.

As a Diuretic or Diaper Pill, one taken half an hour
after dinner, will sufficiently stimulate the digestive
powers of the stomach to a healthy and invigorated
action, and they are found extremely serviceable for
those who indulge in long dinners, or late suppers,
or immediately deserts or fruit.

For a full account of this interesting discov-
ery, read the article of operation, &c., in pamphlet
form, in the hands of all who sell these Pills.

Enquire for PHILIPS' TOMATO PILLS,

and be particular to observe that the label is wri-
ten G. R. PHILIPS, M. D.

Price 31-1-2 cents, with full
directions accompanying each box.

From the Boston Morning Post.

New Medicines. An Alkaline principle called, To-

matine has been discovered in the Solanum class of

plants, particularly in the Tomato, which promises

to be of singular service in Lung Affections, Scro-
fula, and Glandular maladies; particularly of the

Liver, also an antidote to Mercury. It is embodied

in the Compound Tomato Pills, which are truly

worthy of trial.

From the Patriot & Democ.

PILLS. Unlike the numerous speculations of the

day, there is one medicine which deserves the pop-
ularity of the present.

Dr. Phillips' Compound Tomato Pills. Judging from

the patronage they are receiving from the Medical

Faculty, and the approbation of these who have

used them, we should expect they would supersede

all others in use, as a family medicine. Being in

the hands of a physician, &c., it is in the vicinity

of a medical practitioner for the trial of

this medicine, so enabled, this confidently to

speak of it, and fully believe it is entitled to

the confidence of the community.
